

Google Pixel 4A Reinforced Case Spectrum Clear 3m Transparent Itskins

Descriptif produit

An efficient and discreet reinforced case that protects your mobile device up to 3 meters

The Spectrum Clear case offers intelligent protection against drops up to 3 meters.

Your case has the combination of 2 technologies for better shock absorption: IMPACTHANE® polymer and air cushion technology.

The shocks are absorbed, dissipated and repelled by the "honeycomb" HEXO TEK 2.0 air cushion technology on contours and corners of the reinforced case.

Very thin, the case remains super efficient with military quality protection.

The microbial defense built into the IMPACTHANE® antimicrobial materials protects against many common germs and reduces germs by up to 99.99%.

The corners and edges are raised to provide optimum protection for the screen and photo lenses.

Allow free access to all the device's functionalities as well as to the connectors.

It also has an anti-yellowing treatment.
