

Multiports Adapter USB C to VGA + USB C Black Belkin

Descriptif produit

Use a single USB-C port to display VGA video content and to charge your device.

Connect your USB-C device to a projector or monitor and keep it charged with Passthrough technology (up to 60W).

This adapter supports resolutions up to 2048 x 1260 pixels and 1920 x 1200 pixels (1080p) at 60Hz.

So you can enjoy HD resolutions even when using an older generation projector, TV, or monitor.

Plug-and-play technology allows the adapter to work with Macs, PCs, and USB-C tablets.

The CONNECT range of products makes connections easy.

Whether it's cables for charging and data sharing or docking stations for connecting devices together for a simpler experience, CONNECT products transfer data as efficiently as possible while maintaining superior quality.
