

Powerbank Gamma 2 3000mAh 2 USB A+C ports Integrated multi-connector cable White Xoopar

Descriptif produit

The Gamma 2, the compact cable that is always charged and ready to use!

Ready to use
Xoopar has found the solution: a handy multi-cable pocket battery that charges at the same time as your smartphone when you use it with an external power source.

Pocket size
This pack will allow you to charge all your electronic devices anywhere: in the underground, in the middle of a shopping session or even while hiking!

3000 mAh external battery
Its 3,000mAh battery allows you to fully charge your smartphone.

Compatible with any type of device (smartphone, wireless headset, electronic cigarette...)
Multi-cable all in one dual connector Type C / Lightning / Micro USB / USB made from recycled plastic bottles (RPET). You will be able to recharge any type of nomadic device such as your wireless headphones, your electronic cigarette or for the extreme sportsmen, your GoPro.

Biodegradable
The battery case, the body of the USB cable and the connectors of this eco-responsible pack include a BIOSPHERE additive that makes the ABS biodegradable between 3 and 5 years. The cables are made from recycled plastic bottles.

Cardboard certified from responsible forest management paper
Eco-friendly packaging from Cardboard certified from responsible forest management forests
