Power Delivery
Its Power Delivery compatible charging protocol is much more efficient than conventional charging technologies. Compatible with iOS (Apple) and Android (Google, Samsung, Xiaomi, Oppo…) devices, it offers an ultra fast, safe and convenient alternative to charge all your devices.

Extremely fast charging time
The USB C port on your charger offers a maximum charging speed of 20W to charge your device up to 70% faster than standard 5W * technology. This technology will allow you to charge up to 50% of the battery of your iPhone 8 or later or your Samsung S20 or later in about 30 minutes!

Smart
The charger automatically detects the charging current required for fast charging. When the charge level reaches 100%, it cuts off the power supply, preventing the battery from running without interruption. This innovative technology avoids the risk of overheating and gives a longer battery life. When you're in a rush, our chargers will give your battery a boost in no time.

Power Delivery compatibility
To get the optimal charging speed from a Power Delivery charger, you need an Apple or Android device compatible with this technology, a USB type C to USB type C or Lightning to USB type C charging cable and a USB-PD compatible charger.

* The recharging time depends on the recharging capacity of the devices but also on the temperature, the wear of the battery, the power delivered by the charger and the charge level of the device.

Works with the following protocols: FCP (Huawei), PPS (Samsung), PD 3.0 (Apple, Samsung, Fairfone, One Plus), Apple 2.4A (Apple)
