AirPods Pro True Wireless Earphones In-Ear MagSafe wireless charging box White Apple

Descriptif produit

AirPods Pro feature active noise cancellation to ensure immersive listening, even in noisy environments like public transport. IPX4 certified, these Apple earphones offer good resistance against perspiration and rain.

Put some magic in your ears
AirPods Pro feature Active Noise Cancellation to immerse you in sound, Transparency mode to let you hear what's going on around you, and adaptive design to wear them comfortably all day. Like AirPods, AirPods Pro magically connect to your iPhone or Apple Watch. And they're ready to use right out of the box.

Dynamic noise reduction
Incredibly lightweight, AirPods Pro with Noise Cancellation isolate you from your surroundings so you can focus on what you're listening to. By continuously adapting to the geometry of your ear and the shape of the ear tips, Active Noise Cancellation technology silences the outside world and lets you fully immerse yourself in your podcasts, calls and music.

Transparency mode
Switch to Transparency mode, and AirPods Pro let outside noise filter through, letting you hear the world around you. AirPods Pro's interior and exterior mics cancel out the noise-isolating effect of the silicone tips so everything feels natural, like when you're talking to people around you.

Redesigned comfort
Available in three sizes, the tapered tips offer you optimal comfort. Because they adapt to the shape of your ears, your AirPods Pro stay in place. And they guarantee exceptional isolation, for superior noise reduction.

Unparalleled audio quality
An exclusive low-distortion, long-excursion driver delivers powerful bass. A high-dynamic-range, ultra-low-power amplifier delivers pure, crystal-clear sound while extending the battery life of your AirPods. Adaptive equalization automatically adjusts the music to the shape of your ear to give you powerful, balanced sound.

Always more magic
The Apple-designed H1 chip ensures extremely low audio latency. The pressure sensor on the stem lets you control your music and calls and switch between Active Noise Cancellation mode and Transparency mode. With Announce Messages with Siri, you can ask Siri to read your text messages through your AirPods. And with Audio Sharing, you and a friend can listen to the same audio stream on two pairs of AirPods. So you can play a game, watch a movie or listen to a song together.

Bluetooth 5.0 headphones
Active noise reduction
