

iPhone 12 Pro Max MagSafe Case Silicone Navy Blue Apple

Descriptif produit

Designed by Apple, the Silicone Case with MagSafe is a stylish way to protect your iPhone.

Made of 55% recycled silicone, this case has a silky-smooth exterior that feels great in your hand, while a thin microfiber lining adds protection on the inside.

This case lets you use Camera Control. It features a sapphire crystal surface combined with a conductive layer that transmits your finger movements to the Camera Control.

With built-in magnets that fit snugly around your iPhone, the case attaches with near-magic ease and offers faster wireless charging. To charge your iPhone, simply leave it in the case and snap on your MagSafe charger or place it on your Qi2 or Qi-certified charger.

Like every Apple-designed case, this one undergoes thousands of hours of testing throughout its design and manufacturing. It not only looks great, it protects your iPhone from scratches and drops.
