

2-Pack Smart LED bulbs Antalya 7W E27 Google Assistant, Alexa & Siri White + RGB Multicolor Konyks

Descriptif produit

A pack of 2 connected E27 LED bulbs that can be controlled remotely!

New EASY RANGE

Super-fast installation with local Bluetooth control. During installation, the app detects the bulb and helps you install it automatically in just about 10 seconds. In case of a Wi-Fi outage, Bluetooth takes over, and you can continue to control the bulb locally.

Powerful lighting

1050 lumens in White, 11 Watts (equivalent to 90W incandescent)

Create your moods

RGB colors, White, Warm or Cool from 2700K to 6500K, adjustable via the app or voice commands. Perfect for a gentle wake-up!

With Music

The lighting can also be synchronized with music playing on your smartphone. Club atmosphere at home!

Voice control

With Alexa, Google Home, or Siri Shortcuts, you can control the bulb from your sofa with a simple voice command. For example, "OK Google, turn the bedroom light blue."

Smartphone Control

Whether you're at home, at the office, or anywhere in the world, you stay in control of your devices.

Automate Easily

The Konyks app makes it very easy to create scenarios (sequences of commands) or multiple conditional automations, e.g., switching the children's bedroom lights to nightlight mode at 9:00 PM.
