SAMSUNG

# 4-Pack Android Bluetooth® Smart Object Trackers Galaxy SmartTag 2 Black White Samsung

## Descriptif produit

### Hook it. Locate it. So you don't get lost again.

The little hero that makes everyday life easier
Monday morning, 8.30am, you're just in time to catch your train, but you can't find your keys. Luckily, your Galaxy SmartTag2 is there. Instead of searching everywhere for your keys during the 15 precious minutes that will make you miss your train, you calmly take your Galaxy smartphone and locate them in the blink of an eye thanks to SmartThings. You've saved 12 minutes, and the price of your train ticket!

It watches over you everywhere, in all weathers, and for a long time to come
Thanks to its small keyring size, the Galaxy SmartTag2 can be attached to all your everyday objects. And with a battery life of 500 days (and up to 700 days in energy-saving mode), it's easy to forget. And that's just as well! All-terrain and hard-wearing, you can forget about it without fear. Thanks to its IP67 certification, it'll find your things anywhere, even when your little nephew has put your keys in the water or your dog has spent the day outside rolling around in the mud. This little hero even gets involved when it comes to helping around the house, thanks to its IoT functions that can be configured in the SmartThings application.

Say goodbye to hours of searching and stress, let yourself be guided
Save yourself the famous "Can you remember the last time you saw it?", the SmartThings interface will point it out for you. Save time, energy and peace of mind. Once you've registered your SmartTag2 in SmartThings, finding your items is simple and intuitive.

Right there. A little to the left.
Follow the nearby search instructions, which will tell you how far away the object is and in which direction to look. If you still can't see your object, ring the Galaxy SmartTag2 remotely via your smartphone. There's no excuse for not finding your keys!

Really lost? Let us help you
When Lost Mode is activated, your Galaxy SmartTag2 can be read by another Galaxy smartphone using NFC (Near Field Communication) technology. Your SmartTag2 will then display your contact details and saved message on the smartphone. If someone finds your object with the SmartTag2 on it, all they have to do is flash it via their smartphone, and they can contact you to return it.

A hero that adapts to all your uses, but always in style.
Need extra protection and an integrated carabiner to attach the SmartTag2 to your favourite objects? Make it a truly colourful accessory that complements your style.
