Smart Watch FW51 Black Crystal Maxcom

Descriptif produit

Feminine Smartwatch that sets you apart from the crowd.

Simply beautiful
FW51 will add brilliance to your everyday life. With Crystal, you don't need any additional jewelry or extravagant outfits to attract attention. Elegant, sparkling, black crystals will elevate your style.

Elegant in every detail
Sleek and slim (only 9.5 mm!), with a strap adorned with high-quality crystals, finished in a subtle golden color. The entire design is meticulously crafted with the smallest details in mind.

Customized for You
The 1.09-inch HD screen and unlimited watch faces allow you to express your style beautifully. Choose from elegant and sporty designs, monochrome and colorful, subdued and bold. Have fun and enhance your style with an original watch face! Your imagination is the only limit.

Caring for your health
Do you think the rich form comes at the expense of the interior? Not at all! Crystal comes with a range of useful features. Heart rate, blood pressure, and blood oxygen levels are just some of the measurements that take care of your health and well-being. Readings are in real-time, and the optical sensors ensure accurate results. *Remember, however, that the smartwatch is not a medical device.

Designed with women in mind
Crystal was created with women in mind. The watch is equipped with menstrual and pregnancy calendars, ensuring complete control over such important aspects of your daily life.

On your way to your dream silhouette!
Always on the go? Turn it into success! With Crystal, you can keep track of the number of steps taken, calories burned during brisk walks, and your heart rate. All of this will help you turn a simple walk into an effective workout. All parameters are automatically recorded in the dedicated app.

Stay connected with the world
With Crystal, you won't miss any important information. No need to worry about missing out on anything. Notifications will appear when you receive messages and calls, keeping you up to date at all times.

Lasts a long time
Heading away for a week without your smartwatch charger? Not a problem! The watch will last up to 7 days without charging.

And much, much more...
Smooth operation and a fully touch-responsive display ensure a fast and enjoyable experience with the smartwatch's functions.
