A smartwatch that sets you apart from the rest

The Titan Valkiria smartwatch is designed for women who aren't afraid to achieve their goals. This cutting-edge watch inspires you to discover new possibilities, explore, and enjoy free time and moments of self-care. Femininity doesn't need makeup and high heels—it can be expressed through naturalness, passion, and elegant comfort.

Gorilla Glass 3

The Valkiria can accompany you in all conditions without fear of cracking or scratching the screen. The reinforced Gorilla Glass 3 boasts impressive resistance to damage.

Quality with Style

The 1.3-inch AMOLED screen with its perfect contours ensures brilliant readability, saturated colors, and sharp contrast. The Always On Display (AOD) option allows the clock to be displayed even when the screen is off, maintaining the classic watch function.

Improved Battery Life

The Titan Valkiria requires 2 hours to fully recharge its battery. The smartwatch can last up to 3 days with AOD (Always On Display), up to 12 days with daily use, and up to 50 days in standby mode.

Voice Call Function, Notification System

With Valkiria, you can stay connected to the world, wherever you are and whatever you're doing. The voice call function allows you to make and receive calls without having to pick up your phone. You can also read system or social media notifications and incoming messages. The choice is yours—you can disable these settings if you wish.

The Power of Your Passion

Titan is a collection of watches designed for training in all conditions, including the most extreme, such as mountaineering or kayaking. Valkiria offers 70 sports modes, including intelligent recognition of 6 core disciplines. Among others, you'll find yoga and cardio training. The SWOLF function awaits water sports enthusiasts. Data such as distance traveled, calories burned, and heart rate are automatically recorded in the dedicated app.

24/7 Heart Rate Monitoring

Valkiria is equipped with an intelligent health management system. It continuously monitors heart rate and oxygen saturation and has an alert system that notifies you when your parameters start to deviate from the norm. The watch also measures blood pressure and can assess your stress level. From a woman's perspective, the menstrual cycle tracking and due date calendar functions are very useful.

Resistant to Compromise

This is the first outdoor smartwatch designed for women, with a high-quality plastic case, an aluminum bezel, and a stainless steel back. Thanks to this, the watch is slim and incredibly lightweight, yet also resistant to damage.

Military Certifications

The Valkiria has been tested according to the most stringent military durability standards (MIL-STD-810H). Twelve military certifications attest to its durability in the most demanding environments, whether highly humid, muddy, salty, cold, or hot.

IP69, 5ATM Water Resistance

Valkiria is a reliable companion for underwater adventures. Its IP69 water resistance rating makes the watch water-resistant, and the 5ATM rating means it can easily withstand depths of up to 50 meters.

Technical characteristics

Product name: FW100 Valkiria
 Dimensions: 46×44×12mm
 Weight: 55g
 Screen: 1.3" 360px × 360px AMOLED Gorilla
 Battery [mAh]: 300
 Chipset: RTL8763EWE VP
 Memory: RAM 64 KB + ROM 128 MB
 Waterproofing: ATM5 / IP69
 App: Glory Fit

Compatible mobiles

Compatibilité

Compatible avec : IPHONE 3G .

Compatible Bluetooth®
