Santa Monica True Wireless Earphones Midnight Black Urbanista

Descriptif produit

Urbanista Santa Monica, our first Open Fit true wireless earbuds featuring cutting-edge Adaptive Noise Cancelling technology that scans the ear canal to filter out unwanted sounds and optimize performance

Powerful, Adaptive Sound
Santa Monica's Adaptive EQ technology adjusts low- and mid-range frequencies based on individual ear canals and fit, ensuring deep, powerful bass while preserving every detail.
The 13 mm dynamic drivers and bio-fiber diaphragms deliver deep, resonant bass, rich mids, and crisp highs with reduced distortion. The bio-fiber material's rigidity and natural damping properties minimize unwanted vibrations and resonance, enhancing clarity and responsiveness for a more accurate sound.

Open Fit Adaptive
Noise Cancelling
Santa Monica's Open Fit Adaptive Noise Cancelling technology scans the ear canals to optimize ANC performance, seamlessly adapting to each individual ear. It filters out unwanted sounds and detects ambient noise, including traffic hums, air conditioners, and drones.
With up to 30 dB of noise reduction and a bandwidth of up to 2,000 Hz, Santa Monica delivers a cutting-edge Open Fit Adaptive ANC in any environment.

Enjoy your listening up to 24 hours
4 hours playtime in the earbuds (3 with ANC enabled)
20 hours additional playtime in the case. (16.5 with ANC enabled)
USB Type-C charging

Crystal-Clear Conversations
Stay connected and heard in any setting with Santa Monica's advanced wind-noise reduction airflow structure, which separates the microphones from direct wind exposure. Featuring a total of six microphones (three on each side) these earbuds are engineered to minimize wind interference and deliver crystal-clear voice quality during calls, even in breezy or challenging outdoor environments.
