

Smart Watch FW64 Oxygen 2 + Strap France Black Maxcom

Descriptif produit

The jewellery watch that combines elegance and technology.

Meet Oxygen 2
A jewelry smartwatch designed for women who want to combine subtle elegance with the convenience of using modern technology. The set includes a perfectly matching bracelet by ANIA KRUK, which will give your outfit a dazzling look both for everyday wear and special occasions.

Dazzling shine
The rectangular case in elegant black and rose gold gives this bijouwatch a tasteful appearance. The discreet shimmer of the jewelry bracelet emphasizes feminine delicacy and enhances self-confidence, whether you're heading out to meet friends or to a formal dinner.

Amoled screen and unique dials
The easy-to-read AMOLED screen impresses with its vibrant colors and deep contrast. Choose from dials designed specifically for the Oxygen 2, from a library of over 100 free graphics available in the app, or create your own custom design so your bijouwatch always matches your mood and style. For fans of traditional watches, the Oxygen 2 offers an Always-on Display option, which displays the time continuously without having to activate the screen.

Conversations without a phone
Oxygen 2 supports you in everyday life. Read messages, make calls, and receive notifications from your favorite apps like WhatsApp—all without having to reach for your phone. One touch is all it takes to stay connected.

Ania Kruk bracelet as a gift
The Ania Kruk bracelet creates a harmonious, eye-catching ensemble. Designed exclusively for Maxcom, the delicate Ania Kruk happiness bracelet features an 8 x 10 mm diamond-shaped pendant and a 925-karat rose gold-plated 24 sterling silver brand marker. This delicate yet expressive piece of jewelry complements the overall look perfectly, making the Oxygen 2 the perfect accessory for the confident woman.

Wellbeing on your wrist
Built-in optical sensors allow you to measure your heart rate, blood pressure, and blood oxygen levels, as well as your menstrual cycle, 2/XNUMX. All results are automatically saved in an intuitive app. Oxygen XNUMX monitors your health and daily well-being by reminding you to drink water and motivating you to take a targeted number of steps.
Remember, however, that a smartwatch is not a medical device – treat it as a valuable support in everyday health care, not a replacement for professional tests.

Sleep analysis
Oxygen 2 monitors your sleep, recognizing deep and light sleep stages, REM sleep, and awakenings to help you better understand your nighttime sleep patterns. Ensure proper regeneration, and you'll wake up each morning feeling more energized and well-being.

Monitoring physical activity
Although the Oxygen 2 is designed primarily with wellness and style in mind, it doesn't forget about sports features. If you feel like working out or going for a walk, select the appropriate sports mode, and the smartwatch will record your steps, heart rate, time, calories burned, and distance traveled. It's the perfect companion for staying fit without sacrificing a stylish look.

Long operating time and fast charging
Even with heavy use, you don't have to worry about running out of power – the durable battery will keep you going for hours. And when it's time to charge, you can do it quickly and efficiently, so you can enjoy all the Oxygen 2's features again. It's the perfect companion for staying fit without sacrificing a stylish look.
