

Bluetooth® Party Speaker Partybox Stage 330 280W Waterproof Luminous Carrying Handle and Wheels Black JBL

Descriptif produit

Portable party speaker with legendary JBL sound, futuristic lighting, telescopic handle and wide wheels

Set the mood with legendary JBL sound
Turn it up and experience what 280 watts of legendary JBL sound can do. Two 6.5" woofers deliver deep, chest-pumping bass, while two 25mm PEN dome high-frequency drivers keep hooks crisp and harmonies clear. All while a wider soundstage draws everyone onto the dance floor. The whole crowd will feel it, not just the front row.

AI Sound Boost makes every sound more impactful
AI Sound Boost analyzes your music in real time and predicts speaker movement to maximize your bass and volume while minimizing distortion. Translation: fuller, clearer sound that stays punchy even when you crank the music all the way up.

Adaptive futuristic light show
A futuristic light show that dances with you. Swirling light trails and punchy strobes sync to the beat drawing a variety of patterns: you can adapt the lights to whatever mood the night throws at you, while an updated top panel gives you quick access to light and audio effects.

Up to 18 hours of playtime and fast charge
A single charge. Power all day long. Up to 18 hours of playtime. And with fast charging, an extra 10 minutes of charge gives you two extra hours of music, so you can always keep going until the last minute. Need more? Replace it with a spare battery (sold separately) and dive right back into the rhythm.

Telescopic handle, wide wheels, and splashproof build
The JBL PartyBox 330 is built to move. Extend the locking telescopic handle, tilt it back onto the wide, sturdy wheels that roll easily over grass or sand, and go: from the living room to the lawn, or wherever the night takes you. Its IPX4 splashproof design keeps the music going outside without worrying about sudden rain.

Full connectivity, Auracast™, Smart EQ, and eco-design
Plug in two mics and a guitar for live jams, or use JBL EasySing mic compatibility with AI vocal extraction to turn tracks into instant karaoke. Benefit from Smart EQ mode that auto-balances music and vocals, USB-C input for lossless audio, optical TV input, Bluetooth 6.0, JBL One app control, and Auracast™ multi-speaker pairing. Crafted with recycled plastic and packaged in FSC-certified paper with soy ink.

Compatible Bluetooth®
