

TechniSat

Gas detector with siren Tuya White Technisat

Descriptif produit

Protect your home against invisible risks with this high-sensitivity gas detector, designed for reliable home monitoring and immediate alert responsiveness.

Advanced natural gas detection
This sensor uses an electronic semiconductor control system specifically calibrated to detect methane (CH4) in the air. Essential in kitchens, boiler rooms, or garages, it quickly identifies dangerous concentrations of this invisible yet extremely flammable gas.

High-performance triple alert system
In case of danger, the device simultaneously triggers a powerful 85 dB siren, a visual light signal, and an instantaneous notification on your smartphone via the Tuya app. This multi-platform responsiveness ensures you are warned in time, even remotely or while sleeping.

Simplified installation and intuitive maintenance
Designed for immediate startup, the detector plugs directly into a standard 100V-240V mains socket without complex wiring. It features a test button on the front to verify system operation and comes with a complete wall mounting kit.

Durable reliability and compliance
Certified according to the European standard EN 50194-1:2023, this sensor ensures constant and reliable monitoring of your environment. Its technology offers an operational lifespan of up to 5 years, representing a long-term safety investment for apartments or commercial buildings.

Compatible WiFi + Bluetooth®

Color : **White**

Ref : **TECHNISATDETECTGAZ**

EAN : **4019588533905**

Pack contents : Gas detector with siren Tuya + 2 mounting dowels + Tuya configuration guide + User Guide/Security/Warranty

Technical characteristics

Connected Security: Sound (85 dB), visual alerts, and smartphone notifications via the Tuya app.
Precise Detection: Specific high-sensitivity sensor for natural gas (methane CH4).
Quick Installation: 100-240V mains power and wall mounting kit included.
European Standards: EN 50194-1:2023 certified product with a 5-year lifespan.
