

Powerbank Turbo 20000mAh 2 USB A+C ports 30W QC/PD Built-in Cable Gray Rivacase

Descriptif produit

Power up all your mobile devices at maximum speed with a 20,000 mAh high-capacity external battery delivering 30W output and two built-in charging cables.

30W High-Speed Power Delivery Charging Engineered to efficiently charge your mobile gear, this external power bank provides up to 30W output through Power Delivery and Quick Charge 3.0 standards. It rapidly recharges smartphones, tablets, and compatible laptops. Massive 20,000 mAh Energy Reserve With its substantial 20,000 mAh capacity, this portable charger supplies multiple full charges for your devices during daily commutes, long travel, or busy workdays. Integrated Dual USB-C and Lightning Cables Featuring two reinforced cables built directly into the housing, it eliminates the hassle of carrying extra charging cords. Always have the right connector ready for both iOS and Android mobile devices. Accurate Digital Battery Indicator An integrated LED digital display shows the exact remaining battery percentage in real time. Easily verify your available power reserve at a quick glance before heading out. Advanced Safety and Multi-Protection System Built with comprehensive electronic protection, this battery guards your connected devices against overcharging, overheating, and short circuits for safe everyday operation.

Universal - Port(s) USB 2A+C

Color : Gray

Feature(s) : Battery Capacity: 20000mAh - Built-in Cable

Port(s) : USB C & Lightning

Power : 20000mAh

Ref : RIVACPBVA2612GR

EAN : 4260709015071

Pack contents : Powerbank Turbo 20000mAh + USB C & Lightning Cable + User Guide/Security/Warranty

Technical characteristics

30W High-Power Output: Ultra-fast charging supporting Power Delivery and Quick Charge 3.0. Substantial 20,000 mAh Capacity: Ample power supply delivering multiple recharges on the go. Built-In USB-C & Lightning Cables: Convenient dual integrated charging cords for maximum convenience. Digital LED Display: Precise real-time percentage readout of remaining battery level. Comprehensive Multi-Protection: Advanced safety system preventing overcurrent and overheating.
